

Refresher training for Asbestos Removal Supervisors

COURSE DURATION:	1 Day
COURSE FEE:	Contact Us for Pricing
CITB TRAINING LEVY AVAILABLE	

This training course is a general industry refresher for asbestos removal supervisors to update their knowledge of asbestos removal practices and procedures

COURSE CONTENT

The content of this annual refresher is constructed from information gained from a number of industry sources to create a dynamic training session. Content is gathered from various industry sources: Leftfield Environmental Site Audit Scheme results, feedback from BOHS Royal Society for Public Health (RSPH) and National Vocational Qualification (NVQ) assessments, and HSE audits, as well as updates to legislation. This course ensures that candidates receive refresher training to further enhance their knowledge and practical experience to continue to

work safely and effectively as an operative, as stated in the Control of Asbestos Regulations 2012 (CAR 2012) and Health & Safety Executive (HSE) guidance. Candidates will be given a multiple-choice test along with practical tests (both carry an 80% pass mark). Successful candidates will receive a certificate of attainment which will state the elements covered.

DURATION

One day at Leftfield Environmental centres throughout the year.
